Subject: Submission of manuscript entitled *Adaptive Wildfire Governance Through Reputation-Weighted Response Networks*

Dear Editor,

I am pleased to submit my manuscript, *Adaptive Wildfire Governance Through Reputation-Weighted Response Networks*, for consideration for publication. The paper proposes a governance framework for wildfire response that uses reputation-weighted coordination among distributed response actors. The model combines reputation scoring, resource allocation, and a circulation-inspired participation incentive to improve the timeliness, resilience, and accountability of wildfire governance in high-risk landscapes.

The manuscript is original, has not been published elsewhere, and is not under consideration by any other journal. I confirm that all content is my own work and that the submission is made in accordance with the journal's editorial policies.

I believe the article will be of interest to readers working on crisis response, adaptive governance, and collaborative risk management.

Sincerely,

Fabian Leo Naressi
